

# Rain Golombek | Fullstack Developer

Ramat Gan, Israel | +972-53-831-9450 | [eygolombek@gmail.com](mailto:eygolombek@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## Technical Skills

**Frontend:** React, HTML5, CSS3, JavaScript, TypeScript

**Backend:** Node.js, Express.js, PostgreSQL, MongoDB, Golang (Currently Learning)

**Cloud/DevOps:** AWS (Learning Deployment)

**Tools & Others:** Git, REST APIs, Agile/Scrum, Responsive Design

## Summary

Fullstack Developer with experience building responsive web applications using React, Node.js, TypeScript, MongoDB, and PostgreSQL. Skilled in creating dynamic UIs, managing backend logic, and integrating APIs. Currently expanding expertise in AWS deployment and Golang backend development to deliver scalable, production-ready applications. Self-driven, fast learner, and motivated to contribute to innovative tech teams in Tel Aviv.

## Projects

### Dragon's Hoard | Solo Project

- React and Node.js; migrating to Golang & PostgreSQL for performance & scalability.
- Developed high-performance, interactive UI using Pixi.js and dynamic tilemaps.
- Implemented search, filtering, and state management for complex datasets.
- Learning AWS deployment to host the application in production.

### Yellow Pages | Capstone Project, HackerU

- Built a responsive business directory using React and third-party APIs.
- Applied React Hooks for advanced state management and real-time updates.
- Delivered clean, intuitive UI across desktop and mobile devices.
